

GARDEN PERENNIAL

Daylily 'Stella De Oro'

Hemerocallis 'Stella de Oro'

Americas most popular daylily. Easy to grow. Abundant golden yellow flowers are the first to appear in early summer. Reblooms until fall. The Stella de Oro has lightly ruffled petals and sepals curl back slightly to create a bell like flower with a deep golden yellow throat. Each 2-3/4" bloom is displayed slightly above a neat, compact mound of rich green foliage. Slight fragrance. Mutli-use for borders, slopes, entrances and mixed in with other plants. Drought resistant. Attracts butterflies and hummingbirds. Grows to 18".
